TABLE OF CONTENTS

NUBES

p.24

NUBES Rigour, lightness and versatility: these are the main features of the Nubes collection. A refined collection of cutting-edge products from both a stylistic and technological point of view, for demanding customers seeking a contemporary aesthetic. The distinguishing features of Nubes washbasins are their squareness and inherent versatility, provided by a dual fascia profile, allowing a wall-mounted, built-in or shelf-mounted installation. The edge of the basin, just eight centimetres of which are visible, provides lightness and balance between form and space.

KUBE X

p.36

Kube X emerged out of contemporary trend to develop rectangular forms with pared down lines and slender edges. From the larger sizes down to the smallest, the collection offers square washbasins with many installation options: wall hung, on a countertop or on a mobile support. In addition, the line of washbasins includes two round countertop basins, two rectangular built-in basins, all with very slender edges. Wall hung sanitary ware come in extremely essential lines and are equipped with the technical innovation of GSI extras: the Extraglaze® antibacterial glazing, the Save Water flushing system, toilet seats with the Quick Release mechanism, the slow Soft-Close system and the SwirlFlush® system. Selected products are also available in white matt and Ardesia finishing.

PURA

p.50

The Pura collection is characterized by rational design and stylish elegance. Conservative shapes that skillfully balance straight lines and soft rounding are the result of a long design and development process. The understated purity of the lines gives the products in this range a contemporary elegance and a touch of luxury and refinement that fits with the simple but tasteful style of GSI.

NORM

p.62

Norm is GSI's minimalist offering, for the client with taste who appreciates simplicity. It is a simple range with nothing superfluous, nothing ornamental. Its multiple dimensions and functionality comprise a sanitary range which can be customised to meet a wide range of spaces and requirements. Once combined with accessories and fixtures, this range creates a pleasing, functional elegant and minimal bathroom space.

GOLD & SILVER

p.22

A minimal selection, especially curated to create an unforgettable setting. Two vessel designs, as well as matching wallhung WC and bidet, all available in three stunning options: Gold & White, Gold & Black, Silver & White.

CLASSIC

p.70

The Classic collection exudes GSI's interpretation of elegance through the immediately recognizable stylistic traits of this product range: the classic shape of the washbasins, toilets and bidets, the products have balanced, harmonious shapes with obvious neoclassical inspiration. These are timeless products, which can furnish the bathroom recreating traditional atmosphere of stylish elegance, and to evoke new forms of romanticism as reflected in the new wall-hung sanitaryware.

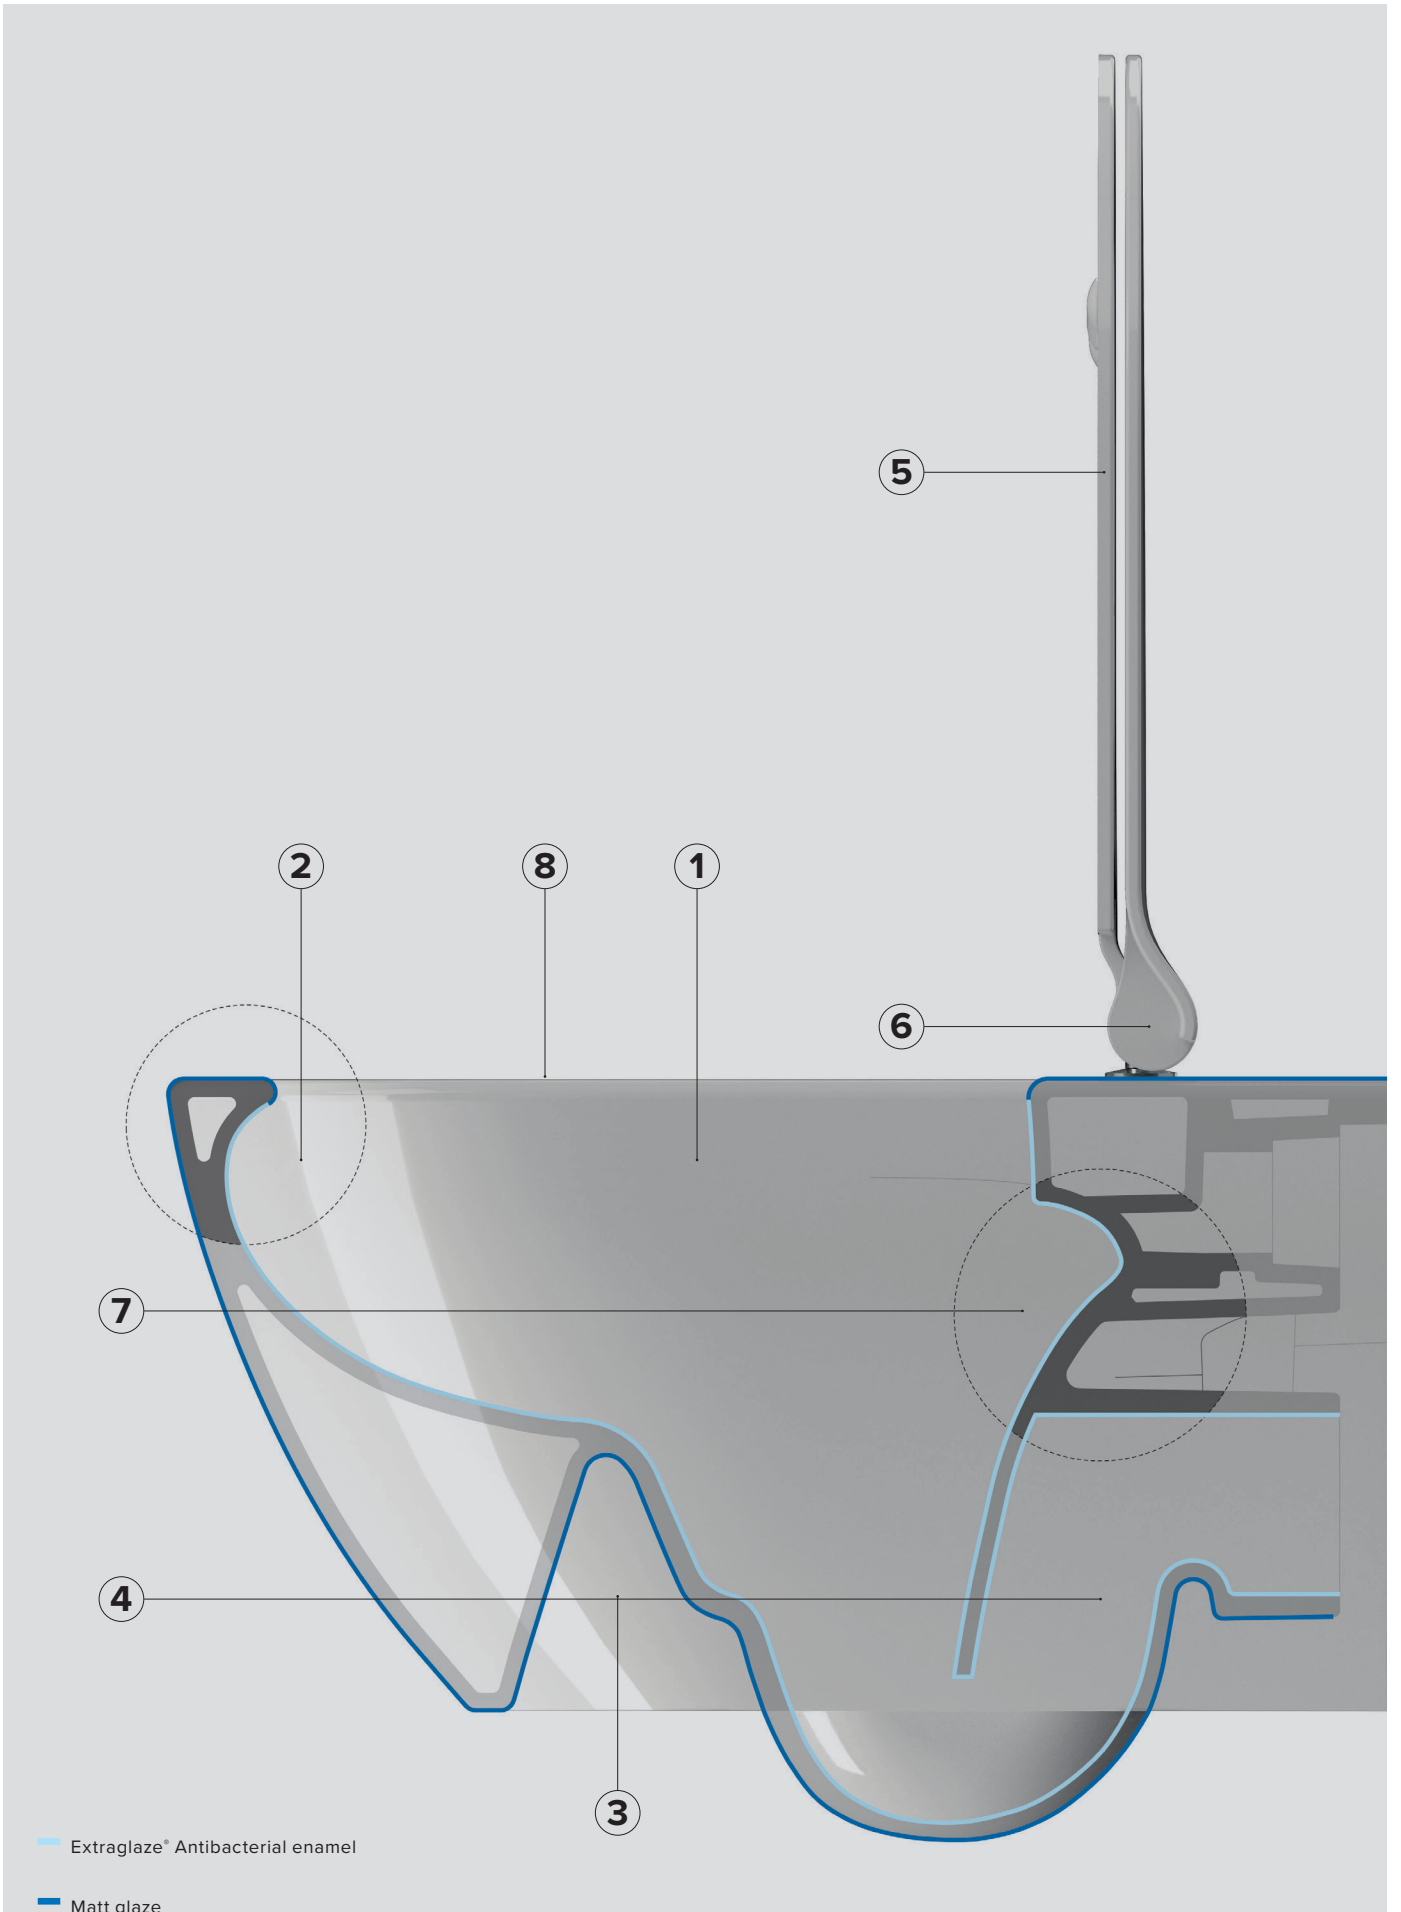

COMMUNITY

p.75

Community is GSI Ceramica's proposal for public or collective bathroom environments. The collection features a line of products designed for people with reduced mobility and is completed by a bidet and a wall mounted WC with the Swirlflush® flushing system and different models of urinals. The products are covered with Extraglaze Antibacterial glaze, a special finishing with silver and titanium ions that reduces bacteria counts by 99.99%.

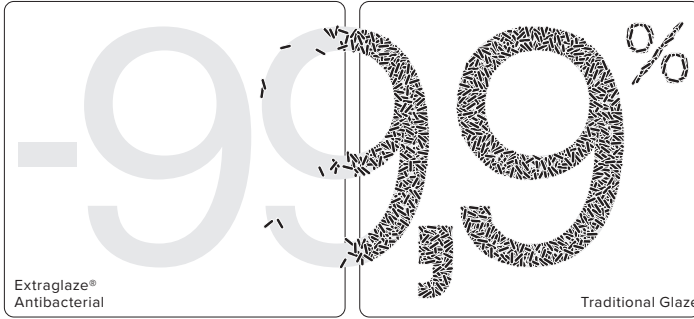

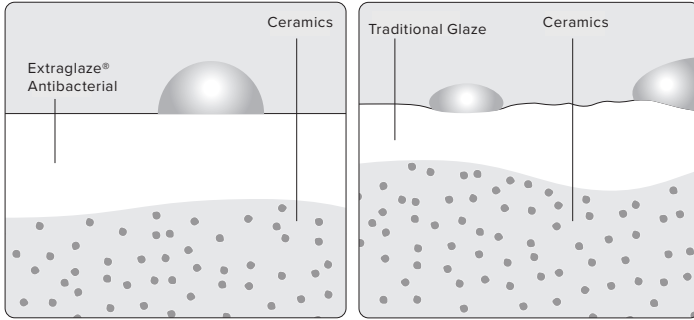

A good project can be considered as successful only if aesthetics and design are backed up by the right levels of hygiene, safety, durability and reliability. To ensure compliance with quality levels regarding these aspects, GSI Ceramica has developed a number of technological innovations and quality patented products, which have been added to practically all its collections.

1. Extraglaze® Antibacterial
2. Swirlflush®
3. Dual Glaze+
4. Save Water
5. Soft Close
6. Quick Release
7. Silent
8. 400 Kg Tested

Plus & Features

1. Extraglaze® Antibacterial

GSI provides hygiene and shininess with the Extraglaze® Antibacterial glaze, the special formula enriched with silver and titanium ions that ensures ISO 22196 certified antibacterial action. The products treated with the Extraglaze® Antibacterial are more resistant to chemicals, and thanks to the extreme smoothness and brightness, they are protected from bacteria and limestone and stay clean longer.

Total Hygiene. Tested and certified for guaranteed 99.99% antibacterial action.

Greater Shine. Protects from limescale and preserves the ceramic's original shininess for much longer.

Quick Cleaning. Special antibacterial action makes cleaning easier and faster for normal hygiene.

Respect for the Environment. Fewer cleaning products are needed due to the smooth surfaces, and less water is consumed when flushing.

2. Swirlflush®

Silent, hygienic, clean. The main characteristic of the revolutionary and exclusive Swirlflush® patented system is the absence of the traditional edge, the rim inside which, in a standard WC water circulates when flushing. The special shape of the Swirlflush® flushing system, the only one patented with a single hole, steers flush water evenly on ceramic surfaces, ensuring perfect cleansing, better draining, and minimising noise (only 64 db instead of 72 of a standard wc).

Noise. The new rinse system minimizes noise during flushing.

Quick Cleaning. The Swirlflush® design has no hidden parts, and thus routine cleaning operations are made easier

Total Hygiene. This WC does not have a rim, the edge beneath which water flows in a traditional normal lavatory. This prevents the formation of limescale and the depositing of bacteria.

Respect for the Environment. This lavatory flushes using less water thanks to the particular shape of ceramic parts making contact with water.

3. Dual Glaze+

Aesthetics and hygiene needn't exclude each other, on the contrary: the Dual Glaze+ treatment, specially designed for total hygiene, combines the elegant opaque finishing on the outside with the shiny, easily washable Extraglaze® Antibacterial glazing on the inside where parts come into contact with water. DualGlaze+ is designed to prevent unhygienic lime deposits, a frequent phenomenon due to the porous nature of ceramic products having a single matt finish.

Total Hygiene. Tested and certified for guaranteed 99.99% antibacterial action.

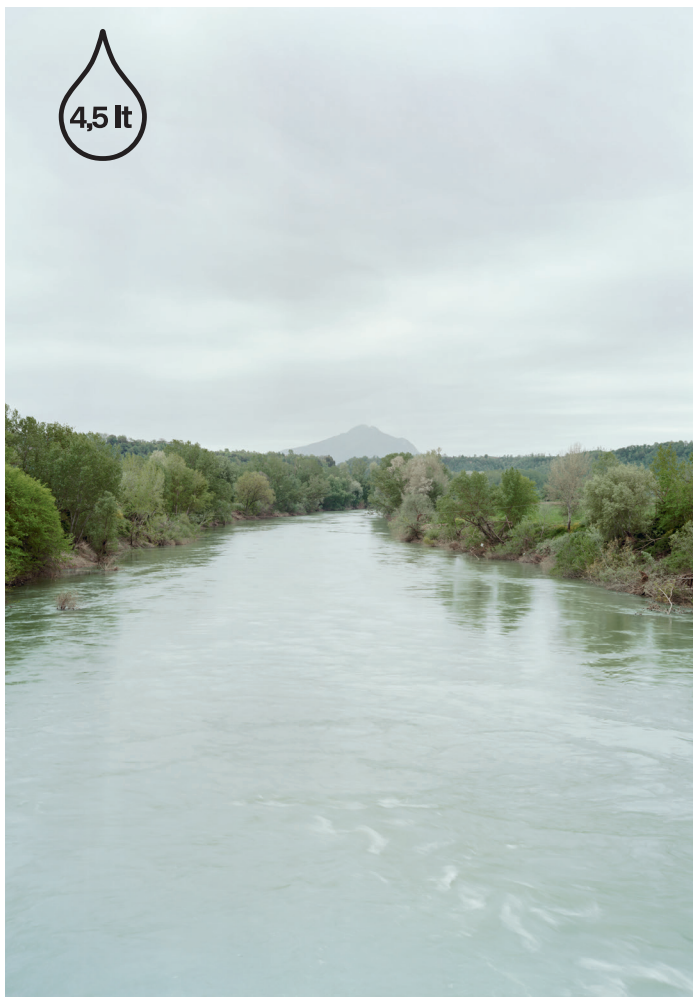

Greater Shine. Protects from limescale and preserves the ceramic's original shininess for much longer.

Quick Cleaning. Special antibacterial action makes cleaning easier and faster for normal hygiene.

Respect for the Environment. Fewer cleaning products are needed due to the smooth surfaces, and less water is consumed when flushing.

4. Save Water

Aiming to preserve the most valuable asset that we have, GSI designs its sanitary ware with the special flush system Save Water, thanks to the special shape of the ceramic parts directly in contact with water. The Save Water system allows you to flush with just 4,5 litres of water.

9

Liters of water generally used.

6

Liters required by European standards.

4,5

Liters of water used by a GSI WC.

5. Soft Close

The Soft Close system predisposes the seat and cover for a slow closing, preventing accidental falls and violent closures of the seat and cover.

GSI's toilet seats are made with FDA- and EPA-registered resins that can prevent the spread of germs and bacteria thanks to the action of silver ions.

6. Quick Release

The Quick Release system, which it allows to pull out the seat and cover in a simple way and without the use of any tool. This will make it possible to clean the toilet seat and even the wc in areas that are usually difficult to reach.

GOLD & SILVER

Rigour, lightness and versatility: these are the main features of the Nubes collection. A refined collection of cutting-edge products from both a stylistic and technological point of view, for demanding customers seeking a contemporary aesthetic. The distinguishing features of Nubes washbasins are their squareness and inherent

versatility, provided by a dual fascia profile, allowing a wall-mounted, built-in or shelf-mounted installation. The edge of the basin, just eight centimetres of which are visible, provides lightness and balance between form and space. A trendy touch is added with the outlet pipe, given a ceramic finish, and positioned flush with the bowl.

Two pairs of sanitaryware items complete the collection: the "55", wall-mounted, and "52", freestanding, both having all the advantages of GSI sanitaryware. The latter is fitted with a new, out-of-sight quick-release system that allows for tool-less removal.

* *We recommend the use of tap without pop-up waste

Kube X emerged out of contemporary trend to develop rectangular forms with pared down lines and slender edges. From the larger sizes down to the smallest, the collection offers square washbasins with many installation options: wall hung, on a countertop or on a mobile support.

In addition, the line of washbasins includes two round countertop basins, three rectangular built-in basins, all with very slender edges. Wall hung sanitary ware come in extremely essential lines and are equipped with the technical innovation of GSI extras: the Extraglaze® Antibacterial

glazing, the Save Water flushing system, toilet seats with the Quick Release mechanism, the slow soft-close system and the Swirlflush® system. Selected products are also available in White Opaco and Black finishing.

The Pura collection stands out for its rational design while embodying the values of simplicity and precision that characterize GSI. Sober forms strike an effective balance between straight lines and supple curves and are the fruit of painstaking planning and design. Pura includes washbasins that are rectangular or with rounded corners, that

can be installed into the wall or supported on a surface, with practical countertops that frame the large basins and with the option to be combined with special towel racks. In addition, Pura also includes a set of supported or semi-built-in washbasins that are available in either colored or white matt finishing.

Hygiene + Dryer

Norm's simple and elegant lines come in a wide range of sizes to meet a variety of needs for space and personalization. The set of washbasins start from large single or twin basin consoles down to the smallest 35x26 hand rinse basin. Designed to be combined with accessories and furnishings, they make it easy to plan a functional bathroom

environment that can be customized in every detail: capacious washbasins, the possibility to add towel racks, the many installation options and finally the different combinable furnishing systems make Norm a high performance collection ideal for subcontracting. Finally, the sanitary elements all come with GSI's special extras.

Neoclassical themes are the inspiration behind the GSI's historical collection of washbasins and sanitary ware. These are timeless products that evoke new forms of romanticism.

The washbasins can be installed into the wall or with their characteristic columns, alone or double depending on the size of the basin, with the option of the towel bar. The line also includes under

counter washbasins that can be installed on mobile supports or on luxury surfaces. In keeping with Classic's sumptuous design, they can be combined with floor standing or hanging sanitary ware, close coupled with a high or low cistern.

Community is GSI Ceramica's proposal for public or collective bathroom environments. This is a line of sanitary ware that guarantees comfort and safety while offering special solutions in terms of design and usage possibilities. Community also

includes a line for differently abled people: the washbasin 70 answers especially to the need to provide service solutions and may be combined with the wall hung wc from the same line. The washbasin is especially suited for all situations

that require high usability and accessibility and it can be supplemented with two practical, lateral chromium plated towel racks. For bathrooms environments for public use, the line also offers two models of urinals.

GSi'S GENERAL CONDITIONS OF SALE

1. Specifications

1.1 The Seller represents only that the products shall be in compliance with:

- I) Technical Sheets published on the Seller's web site (www.gsiceramica.it) which constitute an integral part of these Conditions or those Technical Sheets thereafter delivered by the Seller to the Purchaser which shall be considered incorporated in these Conditions per relationem; or
- II) those further specifications or descriptions (if any) expressly listed or set out case by case under a specific Contract; or
- III) harmonized technical rules applicable to the products in force from time to time in the European Union (if any).

It is agreed that the Seller does not warrant the compliance of the products with the laws and technical rules in force in the country of destination of the products, unless differently agreed in writing.

1.2 No other specification, descriptive material, written or oral representation, correspondence or statement, promotional or sale literature or other data deduced from the samples delivered by the Seller, shall form part of or be incorporated by reference into the Contract between Seller and Purchaser.

2. Prices - payment conditions

2.1 Unless otherwise agreed prices of the products shall be those listed under the Seller's price list in force from time to time. They refer to products sold FCA Seller's premises (ie exworks loaded on board of the means of transport sent by the Purchaser) according to ICC Incoterms rev.2010 or successive updated revision which shall be deemed incorporated by reference into these Conditions.

2.2 Unless otherwise agreed case by case the whole payment under any Contracts shall be made as follows:

- I) 100% due 30 days after shipment
- II) Payable by cheque, wire transfer, ACH, EFT or e-transfer (for Canadian accounts)

3. Liability for defective products

3.1. The Seller undertakes to remedy any non-conformity (defect) of the products for which he is liable, occurring within two years starting from delivery date of the products, provided he has been notified timely about such defect within 2 months.

3.2. In such case the Seller will replace the products (or parts of the products, if applicable) which result to be defective. Alternatively to such replacement, the Seller shall be entitled, at his exclusive absolute discretion, to refund the price of the defective products in the event that such price shall already have been paid by the Purchaser to the Seller or, if such price has not been so paid, to relieve the Purchaser of all obligation to pay the same by the issue a credit note in favour of the Purchaser in the amount of such price. This warranty (i.e. the obligation to replace the defective products or to refund their price) replaces any other legal guarantee or liability provided by law. It is consequently agreed that, except in case of fraud or gross negligence of the Seller, any other Seller's liability (both contractual or extra-contractual) which may arise from the products supplied and/or their resale (e.g. compensation of damages, loss of profit, etc.) is expressly excluded.

3.3 Any complaints concerning the conditions of packing, quantity or outward features of the products (apparent defects) must be notified to the Seller in writing within 15 days from receipt of the products; failing such notification the Purchaser's right to claim the above defects will be forfeited. Any complaints relating to defects which cannot be discovered on the basis of a careful inspection upon receipt (hidden defects) must be notified to the Seller in writing within 15 days from discovery of the defect; failing such notification within such term the Purchaser's right to claim the above defects will be forfeited. The notice must indicate precisely the defect and the Products to which it refers.

4. Product liability claims

4.1 The Purchaser agrees to indemnify and hold harmless the Seller against any product liability claim made with respect to the products and undertakes

to insure adequately against such risks through an insurance policy covering in an adequate manner such risks.

5. Force Majeure - Hardship

5.1 The Seller shall not be under any liability for any failure to perform any of its obligations under any Contract due to Force Majeure. Following notification by the Seller to the Purchaser of such cause, the Seller shall be allowed of a reasonable extension of time for the performance of its obligations. For the purpose of this clause Force Majeure means fire, explosion, flood, lightning, Act of God, act of terrorism, war, rebellion, riot, sabotage, or official strike or similar labour dispute, or event or circumstances outside the reasonable control of the party affected thereby. Should however the situation of Force Majeure continue for more than 180 calendar days, each Party shall have the right to terminate any Contract afflicted by Force Majeure by giving written notice thereof to the other Party by registered letter with return receipt, any right for damages being excluded.

5.2 Should the fulfilment of the Seller's commitments have become excessively onerous compared with the contractual obligations originally agreed upon under the relevant Contract, such as to modify the Seller's costs by over 10%, the Seller shall have the right to request a revision of the Contract's conditions and, failing an agreement, on such revision, to terminate any Contract without whatsoever responsibility any right for damages being excluded.
